

**REMARKS**

The Examiner indicated that pending Claims 1-33 are directed to more than one species of generic invention. Applicants hereby elect PHOTINE PAQ as a single species of tracer molecule for initial examination purposes, with pending Claims 1-31 and 33 reading upon the elected species. Upon allowance of a generic claim, Applicants respectfully request that the Examiner consider claims to additional species. In any event, should the Examiner believe that a telephone interview would aid in the prosecution of this application, Applicants encourage the Examiner to call the undersigned collect.

Dated: August 23, 2007
